

App. No. 10/031287
Amd. Dated November 24, 2003
Office Action Dated August 22, 2003

Amendments to the Claims:

This listing of claims will replace all prior versions and listing of claims in the application.

Claims 1-11 are amended.

Claims 13-17 are new.

Listing of Claims:

- B12
-
1. (Currently Amended) An openable screen element unit for insertion in an opening of a wall, ~~particularly a door or a window~~, comprising at least one screen element side-hinged to a frame structure, said screen element being pivotally mounted over a hinge axis in the frame structure for opening and closing in a direction away from the opening, ~~characterized by~~ wherein the screen element ~~comprising~~ comprises a first and second planar sectional element, ~~preferably rectangular in shape~~, said elements being mutually angled and arranged in different planes with an intersection line essentially parallel with the hinge axis[.]; and wherein the two planar sectional elements are placed in two planes with a mutual angle of 10° to 20°.

App. No. 10/031287
Amd. Dated November 24, 2003
Office Action Dated August 22, 2003

2. (Currently Amended) An openable screen element unit according to claim 1, wherein the two planar sectional elements are placed in two planes with a mutual angle of ~~10° to 20°~~, preferably around approximately 15°.

3. (Currently Amended) An openable screen element unit according to claim 1, wherein the screen element is provided with a rebate along at least ~~[[the]]~~ a side end and top end~~[[s]]~~, said rebate having a complimentary cross section shape in relation to the cross section of the frame structure.

4. (Currently Amended) An openable screen element unit according to claim 1, wherein the two planar sectional elements have two planes that are both different from ~~[[the]]~~ a plane of ~~[[the]]~~ a wall opening.

5. (Currently Amended) An openable screen element unit according to claim 1, wherein the first planar sectional element ~~[[have]]~~ has a plane parallel ~~or coincident~~ with ~~[[the]]~~ a wall plane and the second planar sectional element differing therefrom.

App. No. 10/031287
Amd. Dated November 24, 2003
Office Action Dated August 22, 2003

6. (Currently Amended) An openable screen element unit according to claim 1, wherein the screen element unit comprises two screen elements side-hinged on either ~~at each~~ side of ~~[[the]]~~ a frame structure.

7. (Currently Amended) An openable screen element unit according to claim 6, wherein the two screen elements ~~have the same opening direction~~ open toward a single direction.

B1/2/3
8. (Currently Amended) An openable screen element unit according to claim 6, wherein the two screen elements have opposite opening directions.

9. (Currently Amended) An openable screen element unit according to claim 1, ~~wherein~~ further comprising lighting means ~~[[are]]~~ arranged on one of the group consisting of in ~~connection with~~ the screen element unit and~~[[/or]]~~ the frame structure ~~with optional sensor means for activating the lighting means.~~

10. (Currently Amended) ~~[[A]]~~ An openable screen element unit according to claim 1, wherein the screen element is a fire door.

App. No. 10/031287

Amd. Dated November 24, 2003

Office Action Dated August 22, 2003

11. (Currently Amended) A screen element according to claim 10, wherein the screen element of the door has a space between [[the]] two outer surfaces;

wherein automatic door closing means are arranged in connection with ^{as} the side hinge means.

12. (Previously Presented) A screen element according to claim 1, wherein said first planar sectional element being wider than the second planer sectional element which is provided with locking means.

13. (New) An openable screen element unit according to claim 1, wherein the screen element is a door.

14. (New) An openable screen element unit according to claim 1, wherein the screen element is a window.

15. (New) An openable screen element unit according to claim 1, wherein the screen element is rectangular in shape.

App. No. 10/031287

Amd. Dated November 24, 2003

Office Action Dated August 22, 2003

16. (New) An openable screen element unit according to claim 9, further comprising:
sensor means for activating the lighting means.

17. (New) An openable screen element unit according to claim 1, wherein the first planar
sectional element has a plane coincident with a wall plane and the second planar sectional
element differing therefrom.
